

**HYDROGEN**  
**FUELSYSTEMS**

Save Fuel | Increase Power | Reduce Emissions

# Hydrogen Injection Systems

Hydrogen Injection Systems:  
proudly a Western Australian company.

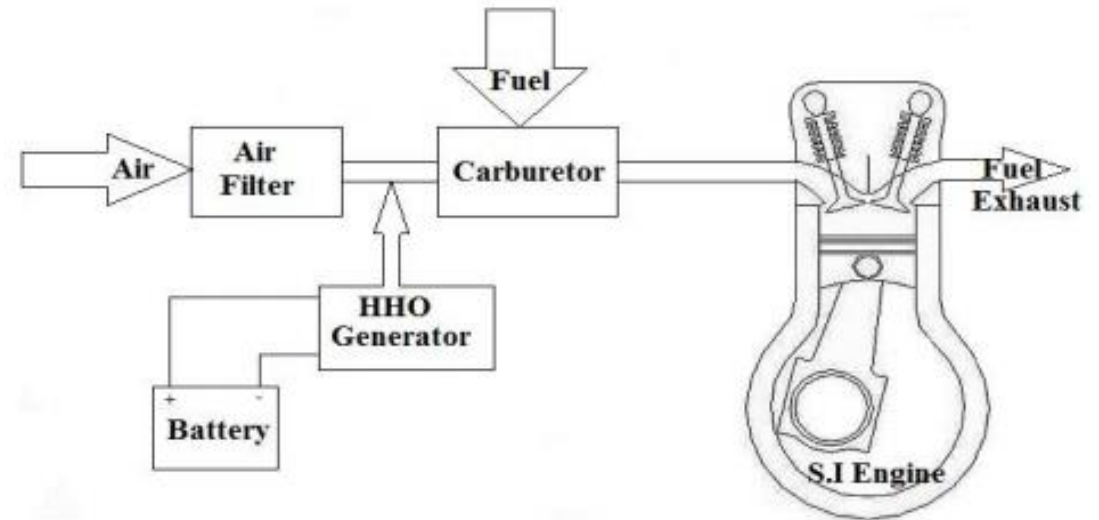

Developed to create a better future  
for the next generation and:

- Reduce emissions;
- Save fuel; and
- Increase power.

# Hydrogen Injection Systems

- ✓ Produces Hydrogen on-board
- ✓ Injects HHO gas into air intake
- ✓ HHO & fuel mixture enters the Combustion cylinder
- ✓ Ensures a more complete & efficient burn
- ✓ Reduces wasted energy

## How it works

1 litre of water = 1,500km

# Benefits

Improves Fuel Efficiency

**Save money \$\$**

Reduces pollution

**Durable, easy to install  
and runs on water**

Reduces emissions,  
including:

- ✓ CO<sub>2</sub>;
- ✓ NO<sub>x</sub>;
- ✓ SO<sub>x</sub>; and
- ✓ Particulate matter.

# Hydrogen Injection Systems

Generation 10  
Up to 4.2L engines

Generation 15  
4.3L to 8L engines

Generation 20  
8L to 20L engines

20L + available

Suitable for  
✓ Diesel  
✓ Petrol  
✓ LPG

# Applications

## Suitable for

Light vehicles  
4WD

Long Haul Trucks

Farming equipment

Mining equipment

Stationary equipment  
Generators
